SCANDAL BOOK

American journalist delves into Deep State maze

ECONOMY 20_11_2023

Luca Volontè

On 14 November, American investigative journalist Seamus Bruner, who led the research teams whose findings triggered multiple FBI and Congressional investigations into the Clintons and Biden, published a disturbing investigation, revealing the plots of billionaires who control the world's levers of power. The world the plutocrats are preparing for us all is far worse than the one imagined by Aldous Huxley and George

Orwell.

In his book *Controligarchs: Exposing the Billionaire Class,* *Their Secret Deals and the Globalist Plot to Dominate Your Life,* Bruner warns us of what our existence will be like if the supranational elites of the many plutocrats dedicated to the good of humanity continue undisturbed to rule international institutions, bureaucracies and influence politicians in many countries. The investigation is based on an enormous amount of financial, public and leaked documents from within the companies, or organisations concerned, insider documents and company records. *Controligarchs* rips back the curtain on never-before-published revelations about the life-changing schemes the globalist elites have in store for you.

In the book, which can be purchased on numerous online sites, there are many investigations, facts, worrying revelations and unmasking of the various Bill Gates, Warren Buffet, Jeff Bezos, George Soros, Mark Zuckerberg and Klaus Schwab who, together with others, are conditioning the future of humanity.

Breitbart, a US conservative online daily news website, published three summaries written by Bruner himself on some of these figures and their billionaire businesses. First of all, Mark Zuckerberg and Meta's use of aggressive tactics to get users addicted to social media applications such as Facebook and Instagram, resulting in an increase in depression and suicide especially among teenagers. Scientific evidence prompted dozens of US Attorneys General last October to take out an injunction against Facebook and Instagram's parent company, Meta Platforms Inc. (Meta), for causing mental disorders in children by getting them addicted to social media platforms. For the 42 states accusing Zuckerberg, he and his companies "knowingly designed and implemented harmful features on Instagram and Facebook to purposely addict children and adolescents", for purely economic reasons.

Bruner's book raises disturbing suspicions about Zuckerberg's plans with Facebook Horizon, since 2021 Meta Horizon, his metaverse that has cost $36 billion so far but aspires to completely shape a new humanity with new consumer product offerings, even physical and biotechnological upgrades for the human body, from a synthetic skin prototype called 'ReSkin' to 'haptic gloves' and 'scent blasters' for sniffing and grasping the metaverse. It is no coincidence that the idea of the metaverse is supported by Klaus Schwab's World Economic Forum (WEF), which takes place every year in Davos, the same WEF stands as the best judge of best practices for this new digital world.

The revelations about Schwab and the WEF in the book from the *Breitbart* article are equally interesting, starting with the extraordinary and anti-democratic influence emanating from Davos, thanks to the CEOs and founders of companies that sit on WEF bodies capitalising a total of $20 trillion. In fact, Seamus Bruner unveils in his book the dystopian tactics the WEF is developing to condition peoples' political and civic life, including: the implementation of central bank digital currencies (CBDC) and digital IDs; instituting climate blackouts; banning gas-powered vehicles, cookers, and butterfly thermostats; banning the consumption of animal meat, promoting the development of lab-grown meat and insect-based proteins; expanding compulsory medical technologies; promoting artificial intelligence (AI) and transhumanism.

With control over critical industries and infrastructure, the WEF and its supranational allies such as the United Nations (UN), the World Bank and the World Health Organisation (WHO) could have "unprecedented control over every aspect of our lives", writes Bruner, according to whom, with the implementation of CBDCs, central bank digital currencies that offer total control over the money supply, "the globalist financial system could financially wipe out (or 'bankrupt') an individual, a society, an entire city or even an entire country".

Inevitably, there were unprecedented revelations about the interests of elites who profit from birth control methods such as drugs, contraceptives, and abortions.. Not only were the enormous profits made by George Soros and Warren Buffett from the sale of the RU-486 abortion pill through a company in the Cayman Islands revealed, but it was also discovered that its marketing was the result of agreements between the Rockefeller Foundation and the Food and Drug Administration (FDA), thanks to Bill Clinton's approval.

The same Soros who with his organisations, writes *The Federalist*, spent as much as $178 million in 2022 alone on campaigns to elect Democratic congressmen and senators, state judges and prosecutors, and to promote and win referendums and influence federal decisions in the US.

We can only imagine how much Soros and his ilk will spend in the US next year on presidential elections, state governorships, pro-abortion referendums and federalHouse and Senate elections. The revelations in Seamus Bruner's book are an eye-opener in Washington, but not in Brussels, where Commission Vice-President VeraJourova even wants to exempt the very NGOs paid by Soros & Co. from financialtransparency requirements, allowing the philanthropist to influence Europe once again.

A weak point remains for these oligarchs and plutocrats, which is that some people are already beginning to see them naked and rebel against their project of domination, according to the ethics of truth, strong in *the power of the powerless* and following the example of the greengrocer described by Havel.
