"The US Constitution does not confer a right to abortion". This is the Supreme Court judgement which has finally canceled the Roe v. Wade ruling which 49 years ago introduced the right to abortion in the United States. June 24, 2022 is now a historic date for the United States and for the whole world.

The sentence, which gives individual states the authority to regulate abortion, confirms the draft that was leaked at the beginning of May and which had provoked violent reactions from abortion groups.

Nonetheless, this is a monumental lesson for all pro-life supporters in the United States: the course of history is not ineluctable, it can be changed for the better when there are people determined to fight without compromise for the truth and the dignity of mankind.

Former President Donald Trump also deserves recognition for this victory: it is thanks to the judges he appointed that the foundations for this historic victory have been laid.
